

GREEN HOTEL.

Solar water heating system used since 1999 for warm water and heating saves about 1 500 l heating oil or 18 000 kWh a year.

Photovoltaic system (since 2011, 10.25 kWp) supplies about 10 000 – 11 000 kWh a year.

The energy bought additionally is **renewable** (no nuclear power).

The use of **LED lamps** reduces electric energy consumption.

Water saving faucet and showerhead adapters save 775 m³ of drinking water and 30 000 kWh energy used for warm water preparation.

The cleaning agents we use as well as our body wash have been ecolabelled with the Austrian **Umweltzeichen** and the **EU EcoLabel**, respectively.

When it comes to waste management, we act according to the **»reduce, reuse, recycle«** principle.

Enjoy our **sumptuous organic breakfast**. All foods we serve are grown with organic methods.

Charge your electric bike or electric car **for free** with renewable energy at our charging station.

Bicycles and **electric bikes** can be **rented** at the hotel.

Advance purchase tickets for all public means of transport are available at the reception at favourable price.

Our bath- and handtowels are made from **100% organic cotton** from controlled organic cultivation.

There are **no mini-bars** in the rooms, which saves about 9 500 kWh and 2 550 kg CO₂ every year.
